

RIPRIDE

Rip Roaring Speed!

The RIPRIDE is the world's fastest cable slide. Custom built to suit your location, this sensational high-speed zip-line allows riders to fly through the air at over 60 miles per hour. Participants can be harnessed solo, or with a friend, as our high-speed trolley and harness system takes them for the ride of their life. The floor on the launch platform suddenly drops below your feet and you begin the terrifying descent. Suspended from the cable like Superman, you place your arms in front of you to break the wind and you actually feel like you are flying. The sound of wind blowing past your ears

loudens as you accelerate faster and faster. Just before you think it's too late to stop before you approach the bottom tower, the automatic braking system brings you to a quick, gentle and smooth halt.

Custom built to your landscape

One of the most appealing features of the RIPRIDE is that it can be built almost anywhere. The cable can be strung across many different lengths and shapes of terrain. The ride can be built over land or over water, indoors or outdoors, at the beach or in the snow, high is the sky or right down low to the ground; it all depends on your location:

- Ski Hills - Stay open in the summer and attract more people in the winter.
- Eco-Tours - RIPRIDES can be set up in some of the most scenic natural settings in the world.
- Amusement Parks - Our towers can be custom built to any desired height.
- Stadiums - Football games, trade shows, flea markets, whatever! The fastest way to go from end zone to end zone.
- Multi-Activity Towers -The RIPRIDE can be a great feature on multi activity towers like the Thunderdome and the Extreme Machine.
- Roof Tops - Fly from one building to another. A good way to get a view of the city.

Built With Safety in Mind

Not only is the RIPRIDE fast and thrilling, but it's also the safest cable-slide ever constructed. Our specialized hydraulic drive system allows for the raising and lowering of the cable to make rider retrieval easy for participants and operators alike. Our redundant harness and trolley system allows for maximum speed and excitement while keeping participants safe and under control. The RIPRIDE also incorporates a unique braking system that takes riders at top speed (60mph) and brings them to a stop almost immediately without any necessary participation on their behalf.

We Are With You All The Way!

Every RIPRIDE comes with 24/hr technical support that continues throughout the life of the ride. We'll give you help with the implementation, installation, and start-up operations. Gravity Works/BCI provides one of the strongest warranties in the industry.
